

ICOM Ltd. - Your Trusted Research and Technology Partner for Mobile Software Projects and Telematics

WHO WE ARE:

ICOM Ltd. is a technology provider specialised in the field of **telematics**, **information security** and **mobile software**, information solutions for **food safety**, and custom hardware and firmware solutions. The company offers advanced **GPS tracking**, **Automatic Vehicle Location (AVL)** and **Fleet management** solutions, and mobile and enterprise application end-to-end solutions.

MAIN ACHIEVEMENTS:

- Advanced GPS vehicle tracking and vehicle fleet management solution "**EuroGPS SmartTracker**" (<http://www.eurogps.eu>). Currently Icom Ltd. is the largest GPS manufacturer in Bulgaria with production of more than 30,000 GPS devices per annum.
- The I&R system **Worldvet** is the most advanced Web-enabled EU compliant system for animal identification, registration, and movement control now available on the market with successful nation-wide implementation in Bulgaria.
- ICOM's flagship consumer product for mobile devices - **Mobipassword** (www.mobipassword.com) is the only secure wallet system on the market that offers personal information management, automated strong authentication, Web and application single sign-on (SSO) in one integrated system available for desktop computers, Palm, Windows mobile, and Symbian-based mobile devices.

COLLABORATION INTERESTS:

ICOM Ltd. is interested in applied research collaboration under EU funded programmes in the field of IT like FP7 and CIP with focus within company's fields of activity. Target role: technology provider.

RESEARCH AREAS:

- Telematics systems, including GPS systems for vehicle, cargo, and personal tracking, systems for vehicle navigation, telemetry systems for data acquisition and control, etc.;
- Application software for mobile platforms including Windows mobile, Symbian, Palm, Blackberry, iPhone, etc.;
- Digital identity, trusted identity, digital signatures, etc.;
- Multi-factor authentication and access control systems, biometrics, finger print recognition;
- Food safety: Animal identification, registration, and movement control systems;
- Hardware development from design through prototyping to manufacturing in own company facilities.

What makes us a good partner

- Reliable, experienced and well networked partner
- Highly qualified, creative and experienced team with inter-disciplinary research expertise
- Recognized leader in the field of telematics and mobile software
- Strong track record of references

REFERENCE PROJECTS:

ICOM Ltd. Has taken part in two EU funded projects (EuropeAID and PHARE), one under national funding (Bulgarian National Innovation Fund) and in a number of privately funded projects.

Selection of EU projects:

WorldVet (EuropeAID) Design and Implementation of an EU Compliant Animal Identification System. ICOM Ltd. acted as a technology partner in the development of this solution for mobile identification and movement control of live animals and assisted the country-wide implementation of the system.

MobiToken (PHARE) Development of the revolutionary "MobiToken" multipurpose information security device, which is the first component of ICOM's Enterprise Security Software Solution UNIPASS.

National Funding:

UNIPASS (Bulgarian National Innovation Fund) an advanced identity and access management solution.

Selection of other projects:

EuGeo - GPS-based vehicle speed control system. Developed for CMT SARL, Marseilles, France.

Mobileplay - mobile content and mobile advertising delivery system. Developed for Moventum, Inc., USA.

Synaptech - Web-based Distributed Health Care Information system. Developed for Sinaptech, Inc. Montréal, Qc, Canada.

PLAVIX - Multimedia Presentation Distribution System. Developed for SuperNova Productions, Inc., New York, NY

NVC TimeMat - Time and Material Tracking system. Developed for NVC, Inc., Boston, MA, USA.

Seroquel Scales - Psychiatric Rating System for mobile devices. Developed for Astra Zeneca International.

OTHER INFORMATION:

Name of the company: ICOM Ltd.

Organizational type: Private SME

Country: Bulgaria

Number of researches: 10+

Number of developers: 40+

Number of employees in total: 70

Working languages: English, Bulgarian

Contact person: Dragomir Bojkov

Position: COO
