

ITware – a leading Hungarian outsource partner and IT supplier in mobile communications

WHO WE ARE

ITware is a Hungarian innovation and R&D focused software developer company, primarily active in the field of mobile communications, digital convergence solutions and ERP software developments. We are the only informatics team in Hungary – 35 highly qualified IT specialists – that has been working for a distinguished domestic telecommunication company for almost a decade and has successfully solved its numerous special problems. We provide comprehensive but individually tailored solutions to individual and highly specific problems of our clients. Due to our own developments that are highly innovative, future-proof solutions we became one of the leading companies in our specific technological area. We have been participating in several national and international R&D projects as a technological partner.

WHAT MAKES US A GOOD PARTNER

- Flexible reaction to technology trends and to changes of clients' needs
- R&D and innovation focused company

- Strategic partner of T-Mobile and Antenna Hungaria
- ISO 9001:2001 certified company
- Member of the IT Service Management Forum
- Member of the Hungarian Association of IT Companies
- Strategic partner of the Hungarian Space Office

REFERENCE PROJECTS

LOGOS – FP6-IST: The aim of the LOGOS project is to build innovative ubiquitous eLearning environment for almost everybody, to open up and make available existing large-scale repositories of digitized information as an easy-to-use source of knowledge accessible from a wide-array of devices. ITware is responsible for the development of the platform for delivering e-learning materials to end-user 3G/GSM terminals.

SMSonline – GVOP 4.1.2: The aim of the SMSonline project was to develop an easy-to-use yet powerful web-based SMS sending system where registered users can send messages to a larger number of recipients easy and fast. It enables the user to keep track of the messages sent: users always get feedback about the delivery or about the eventual failure of their messages. The project was funded by the Economic Competitiveness Operational Programme.

ITstock – Széchenyi Enterprise Development Programme: The aim of the project was to develop a web based service where visitors can perform searches and find business partners. The "subscribers" of the service can receive the offers also by SMS or in E-mail. ITware was the only partner in the project and performed all R&D tasks.

FleetWare: The aim of the project was to develop a system that integrates state-of-the-art technologies to provide a complex, robust and highly customizable positioning solution, based not only on GPS, but also on mobile cell data. This development was the result of a private research.
