

InfomatiX – Hungary's leading software developer in mobile IT

WHO WE ARE

InfomatiX is a privately owned Hungarian software developer company focusing primarily on B2B solutions and mobile technology. InfomatiX has become a significant actor in the Hungarian software development market due to its almost 10 years experience working with leading Hungarian companies and public sector organisations. The different needs of our clients have helped the company to deepen knowledge and become flexible regarding the needs of its clients. Our fast growing company has developed a strong R&D capacity, taking advantage of the links to top-level IT Universities in Hungary. We have more than 40 young & talented software developers.

COLLABORATION INTERESTS

InfomatiX is interested in participating in European and national ICT related research and technology development projects involving mobile information technology. Other possible

WHAT MAKES US A GOOD PARTNER

- Professional & motivated team, best fresh brains from the University
- Solid understanding and great experience in the field of mobile technology
- Experience in remote collaboration, cross-culture R&D FP projects

technological areas are B2B enterprise solutions, outsourcing, extending centralized backend solutions to handheld devices (J2ME, Symbian, Blackberry, WindowsMobile, BREW). Possible role of InfomatiX in collaboration: technological partner, research partner, technology and software provider, consultancy.
