

# Meteksan Savunma Industry Inc.

## WHO WE ARE:

Meteksan Savunma, the technology platform of Bilkent Group leading all defence related programs among Bilkent, is one of the eminent conglomerates of Turkey, and an investment of world renowned Bilkent University.

The Group offers hi-tech tailored solutions and state-of-the-art competitive products for the Turkish Armed Forces as well as other countries. Each company under the group has an extensive potential to create an innovative and committed models of collaboration with customers making the most of the scientific and academic infrastructure of Bilkent University.

Meteksan Savunma's mission is committed to meet the requirements of the Turkish

WHAT MAKES  
US A GOOD  
PARTNER

Meteksan Savunma has an extensive experience in both software generation and hardware design production to undertake engineering projects in the above listed activity areas. and is eager to participate in a FP7 project.

Armed Forces (TAF) by providing local inputs to Turkish Defence Industry with compatible, high-tech international solutions

## COLLABORATION INTERESTS:

1. Sensor Technologies
2. Simulation & Modeling Technologies,
3. Naval & Marine Systems
4. Satellite & Space Technologies

## AREAS FOR R&D COLLABORATION:

- ◇ ICT
- ◇ Health
- ◇ Security
- ◇ e-learning

## REFERENCE PROJECTS:

### Selection of EU projects:

FP7-REGPOT-2008-1

Call Identifier : Simulation Infrastructure for Emergency Management: Reference Implementation for Crises Manager Training System

The main objectives of our proposal are;

- To improve research capacity of Meteksan Savunma Simulation Systems R&D department in the area of Emergency and Crisis Management systems, modeling, simulation and training.
- To build up an asset laboratory for our R&D studies including Emergency Management.
- To improve skills of application of modeling and simulation concepts to crises management systems,

### Selection of other projects:

- Naval Warfare Scenario Simulator: It is an operative and tactical level computer based war simulation system for Navy Forces. Meteksan Savunma is developing a simulator system which meets the Naval Warfare Scenario requirements of Naval Forces
- Millimeter Wave Radar: Development of a millimeter wave radar prototype for Land Forces' helicopters.
- Helicopter Obstacle Detection System (HODS): With this R&D program, a laser based system can develop to prevent collision with possible obstacles such as power & telephone lines, pylons and towers, which could increase flight security at low altitudes in all weather conditions.

## OTHER INFORMATION

Name of the company: Meteksan Savunma Industry Inc.

Legal structure: SME

Country: Turkey

Number of researchers:68

Number of employees in total: 95

Working languages: Turkish, English

Contact person: Nilgün Dinçarslan

Position: •Project Management Engineer

Email: [ndincarslan@meteksansavunma.com.tr](mailto:ndincarslan@meteksansavunma.com.tr)
