

PROVIDER OF INNOVATIVE TECHNIQUES AND METHODOLOGIES IN THE CULTURAL HERITAGE SECTOR

WHO WE ARE:

T.E.A. is an innovative Small and Medium Enterprise (SME) focused on research and testing activities for the preservation and the virtual restoring of **cultural heritage**. We are an experienced developer of **innovative techniques and methodologies** in the cultural heritage sector using forefront tools. In addition we provide consultancy and we are **experienced in economical/financial feasibility studies, surveys and market analysis**. Our most innovative projects are related to integrated systems for recovery and archiving degraded texts.

COLLABORATION INTERESTS:

T.E.A. is interested in partnership in EU FP7 ICT projects and SSH projects as well. Possible role in collaboration: research partner, tester, end user; project manager; scientific coordinator; responsible for dissemination.

AREAS FOR R&D COLLABORATION:

- Experimentation in the Cultural Heritage field.
- Statistical-economical data processing and statistical consulting.
- Geo-information.
- Project Management and technical assistance to public

and private bodies.

- Remote sensing data processing.
- Application of Remote Sensing Techniques and GIS analysis for regional and urban planning.
- Financial and economical analysis.

MAIN ACHIEVEMENTS:

- Winner of Economic progress Award recognised by Italian Chamber of Commerce (2005).
- Member of "Cultura e Innovazione" consortium, aiming at carried out basic and applied research activities, industrial research, pre-competitive development and high level training in the cultural heritage field.

REFERENCE PROJECTS:

T.E.A. has been involved in national and European research and R&D projects.

Selection of EC projects:

I.Sy.Re.A.De.T (FP5): the aim of the project was to realize an integrated hw/sw system for the virtual restoration and the archiving of damaged texts using innovative tools, such as multispectral cameras and image processing algorithms.

Selection of other projects:

M.A.R.E. (supported by Italian Regional Operational Programme): the aim of the project was to realize the regional district for the Cultural Heritage, and to test new tools for the preservation of the marine archaeology.

WHAT MAKES US A GOOD PARTNER

- **Well-qualified workforce.** All our researchers have PhD degrees and specializations.
- **Strong experience** in Cultural Heritage field.
- Strong core competency in planning and management of resources using G.I.S.
- Participation as research coordinator, management coordinator in international projects and events.
- Previous **experience with national-level and EU projects**
